

WATER TANK AND SITE OFFICE FOUNDATION

Digging the foundation.

Water tank to keep water has started doing its work.

Land Rover is carrying water from the nearest place. We thank Wheresoever for helping us with Land Rover for carrying assorted things to the church site but there is a need for God to provide a truck that should be used to carry things for the project and also make income for the ministry.

See the office site foundation in progress.

Soon we will see the building growing.
